---

**School Of DESIGN**

India HCI is a premier international conference in the field of Human-Computer Interaction (HCI) that is held annually in India. It aims to positively impact and shape humanity through high-quality research in HCI and Design. The 14th international India HCI 2023 conference is hosted by the School of Design at UPES in-cooperation with the ACM amongst Dehradun’s beautifully lush and verdant environs.

The conference theme is “HCI for Enabling Creativity” and aims to initiate dialogues, debates, and discussions that enable synergies between Creativity and HCI. We invite authors to present bold ideas and research that further expand the boundaries of HCI research.
